

Cage-Free Eggs at Marriott International

At Marriott International, we have been focused on operating responsibly throughout the company's history. We recognize that animal welfare is an important part of a safe and responsible food & product supply chain, as outlined in the company's [Animal Welfare Position Statement](#).

Marriott International aims to source 100% of eggs (shell, liquid, and egg products) from cage-free sources throughout the company's global operations for all owned, managed and franchised properties by the end of 2025. This is part of a comprehensive set of goals under the company's Serve 360 sustainability & social impact platform. Marriott International reports the company's progress towards sourcing cage-free eggs and all other goals in its publicly available annual Serve 360: Environmental, Social, and Governance (ESG) Report.

Achieving Marriott's cage-free egg goal is a continuing endeavor across the company's ever-growing portfolio, and we are working closely with internal and external stakeholders to achieve this goal.
